

GLOBAL IT SOLUTIONS
Onshore, Offshore, in the Cloud

Why We Are Unique

Viking Innovations is poised to provide your business with IT solutions that add real and measurable value to your bottom line. We match emerging technologies with business processes in ways that maximize your efficiency and facilitate growth. As a result, you'll enjoy competitive advantages on your way to greater success and profitability.

➡ Our certified engineers and consultants come from a variety of backgrounds and disciplines, which provides them with the business insight and technical expertise required to create services and solutions tailored to meet your needs.

➡ We continually refine our processes, utilizing the latest advances in technology to eliminate wasting valuable time and resources on obsolete and ineffective solutions that do not address the challenges you face. Viking Innovations listens to your concerns, and then we turn our focus on delivering relevant solutions that fit your way of doing business.

➡ We have the knowledge, the people, and the partners to create an operationally-excellent IT environment while supporting your business and technology objectives now and into the future.

Innovative Solutions

➤ Global Presence

We have a true global presence that allows us to have 24 hour support personnel online and ready to help in case of emergencies. Having IT systems that are aligned with your organizational needs, gives you many distinct advantages. Our comprehensive assortment of Consulting, Managed IT and Hardware - Software services and Solutions, are geared to create that kind of cohesive environment.

Our solutions, which are created based on our extensive enterprise-level experience, provide a solid foundation for you to improve your service to both your internal and external customers. We are prepared to assist you on short-term projects as well as an ongoing basis if accomplishing your goals requires resources beyond what you have in-house. Regardless of the project scope, our solutions are developed with a focus on costs and performance. This duality leads to an improved productivity of your equipment, your finances and your people.

➤ Network Services & Consulting

We have the technical, written, and verbal communication skills to perform a complete assessment of your current computing situation and offer recommendations for creating a consistent, reliable and secure operating environment. Our consultants are well-versed in identifying opportunities that drive down costs, increase efficiency, and provide flexibility for future growth for ongoing management of your information and services.

➤ Managed IT

Viking Innovations is prepared to provide you with knowledge able IT professionals capable of managing your day-to-day IT operations on a part-time, full-time, project, or contract basis. These individuals have the expertise to augment your existing technical staff if you cannot justify full-time, in-house, IT management. If you are looking to ensure that your IT operations continue to function smoothly during a candidate search, we can provide interim IT management services until a suitable candidate is found. This will allow you and your management team to continue to focus on your business and avoid being sidetracked by technical concerns that keep you from doing what you do best.

Virtualization Solutions

Virtualization Solutions

Viking Innovations offers Virtualization Solutions using VMWare virtualization technology. VMware is the market leader in virtualization and Viking Innovation's team of consultants are here to assist you in designing a virtualization solution that fits the IT needs of your company.

Transform your Business with Virtualization

Virtualization dramatically improves the efficiency and availability of resources and applications in your organization. Internal resources are underutilized under the old "one server, one application" model and IT admins spend too much time managing servers rather than innovating. An automated datacenter, built on a VMware virtualization platform, lets you respond to market dynamics faster and more efficiently than ever before. VMware delivers resources, applications—even servers—when and where they're needed. VMware customers typically save 50-70% on overall IT costs by consolidating their resource pools and delivering highly available machines with VMware.

- Run multiple operating systems on a single computer including Windows, Linux and more.
- Let your Mac run Windows creating a virtual PC environment for all your Windows applications.
- Reduce capital costs by increasing energy efficiency and requiring less hardware and increasing your server to admin ratio
- Ensure your enterprise applications perform with the highest availability and performance
- Build up business continuity through improved disaster recovery solutions and deliver high availability throughout the datacenter
- Improve enterprise desktop management & control with faster deployment of desktops and fewer support calls due to application conflicts

What is Virtualization?

Virtualization is a proven software technology that is rapidly transforming the IT landscape and fundamentally changing the way that people compute. Today's powerful x86 computer hardware was designed to run a single operating system and a single application. This leaves most machines vastly underutilized. Virtualization lets you run multiple virtual machines on a single physical machine, sharing the resources of that single computer across multiple environments. Different virtual machines can run different operating systems and multiple applications on the same physical computer.

Why Your Company Should Virtualize

Virtualizing your IT infrastructure lets you reduce IT costs while increasing the efficiency, utilization, and flexibility of your existing assets. Around the world, companies of every size benefit from VMware virtualization. Thousands of organizations—including all of the Fortune 100—use VMware virtualization solutions. See how virtualizing 100% of your IT infrastructure will benefit your organization.
